

Amendments to the Specification:

Please replace the paragraph beginning at page 7, line 16, with the following rewritten paragraph:

--Dynamic modification of a mapping data structure may be used, for example, to accommodate various changes made in a software development environment. For example, modifications may be made in response to the content stored in a software development environment, e.g., due to release ~~to-release~~ changes such as the addition of products, components of products, or releases of products or components. As another example, modifications may be made in response to changes to the underlying software development environment, e.g., the addition of new commands, parameters, values, etc.--
